

ANNOUNCEMENT

ANTIMICROBIAL RESISTANCE (AMR) AWARENESS SESSION

Date: April 21, 2026

Time: 10:00 AM – 11:30 AM (Eastern Caribbean Time)

Courtesy: COLEAD in collaboration with CAHFSA

Strengthening Awareness on Antimicrobial Resistance in Food Systems

You are cordially invited to participate in an **Antimicrobial Resistance (AMR) Awareness Session** aimed at strengthening understanding of AMR risks and promoting alignment on EU requirements for responsible practices across the agri-food sector. Antimicrobial resistance is a growing global concern impacting food safety, public health, animal health, and international trade. This session will provide valuable insights into the role of agribusinesses, regulators, and food system stakeholders in mitigating AMR risks.

This session is particularly relevant for:

- Livestock and aquaculture producers
- Agro-processors
- Veterinarians and animal health professionals
- Food safety officers and quality managers
- Regulatory authorities
- Agribusiness support institutions

Participants will gain:

- An overview of antimicrobial resistance and its global implications
- Understanding of AMR risks within food production systems
- Guidance on responsible antimicrobial use
- Insights into international standards and regulatory expectations
- Practical recommendations for strengthening preventive controls

PROMOTE RESPONSIBLE PRACTICES, PROTECT PUBLIC HEALTH & STRENGTHEN FOOD SYSTEMS.

MAIN SPEAKER BIOGRAPHY

Ms. Ingrid Morvan

Ingrid Morvan is a French expert in European regulatory and policy matters relating to animals and animal products. She works with COLEAD in Belgium, contributing to the organization's efforts to promote sustainable agriculture and agribusiness through compliance with international and European standards.

Key facts

- **Position:** Expert in European policy and regulation (animals/products of animal origin)
- **Organization:** COLEAD (Belgium)
- **Nationality:** French
- **Education:** Postgraduate degree in Business and European Law
- **Field:** Agricultural sustainability and regulatory affairs

Role at COLEAD

Ingrid Morvan's work centers on the EU policy and regulatory developments in food safety and sustainability in the agri-food sector, and their impact on trade. Her expertise supports COLEAD's mission to strengthen capacity in developing countries to meet sanitary and phytosanitary (SPS) standards and to align agricultural trade with evolving European regulations.

Professional focus

At COLEAD, within [AGRINFO programme](#), she helps understand and apply complex EU legal frameworks governing animal health, welfare, and product safety. This involves advising partners on legislative developments, compliance requirements, and certification mechanisms that influence international market access for agricultural goods. Her role contributes to ensuring that COLEAD's partner enterprises operate within sustainable and legally sound systems of production and trade.

Background and impact

With a postgraduate background in business and European law and 24 years of experience in the EU association representing livestock and meat traders and producers, Ingrid Morvan combines legal acumen with an understanding of agricultural policy. Her contributions enhance COLEAD's credibility as a technical partner for governments and producers seeking to navigate European regulatory landscapes. This expertise is particularly valuable in advancing the organization's goals of food safety, fair trade, and environmental stewardship across global agricultural value chains.
